

Pursuing Electronic Data INTELLIGENCE

Tesia-PCI Terminal

Tesia-PCI Terminal allows practices to check eligibility, submit claims, receive EOB's and claim status without a computer or Internet connection.

What is Tesia-PCI Terminal?

A user friendly, HIPAA-compliant solution to transmit data electronically to insurance payors, with the ability to check patient eligibility and submit claims with real time adjudication results.

For detailed information on Tesia-PCI Terminal, to inquire about free submission to select payors or to start submitting claims today, call Robert Porterfield at (800) 724-7240 ext 4703.

The Tesia-PCI Terminal is an enhancement to Point of Service (POS) devices currently used by thousands of practices, retail stores, restaurants and more. Perfect for practices without computer availability that want the benefits of EDI, Tesia-PCI Terminal accelerates the claim distribution cycle by accessing real time information. Claims sent to select insurance payors are free. No maintenance or transactions fees are required. Best of all, the Tesia-PCI Terminal device is free for new users.

Why Tesia-PCI Terminal?

- Free claim submission to select payors
- Immediate capture of claim charge amount, patient eligibility, deductibles, and co-payments
- Free automated updates (CDT releases, new payors, payor edits, etc)
- Compact design and easy to use - just the thing for practices who want the benefits of real time claims without the hassles of new software and a complex EDI process
